Automation Governance Platform Quest for Successful Robotic Process Automation

The popularity of RPA solution has meant more organizations are scaling their implementations beyond single team or projects and applying it to whole program.

The Automation Governance Platform is an E2E solution for organizations delivering a successful RPA program of any size.

It emphasizes on quality deliveries which incorporate industry expert knowledge and the ability to adjust and adapt to today's dynamic enterprise needs.

Eviden solution

Eviden Automation Governance Platform serves as a robust foundation for enterprises venturing into their Robotic Process Automation (RPA) journey. It stands out by leveraging Eviden's extensive expert knowledge, empowering the implementation team to achieve remarkable success in their RPA initiatives.

This platform introduces a transparent mechanism through a self-service portal, allowing efficient monitoring, control, and fine-tuning of all activities across various phases: Ideation, Discovery, Design, Development, Testing, and Monitoring. Notably, it operates as a versatile application with a plug-and-play architecture, seamlessly accommodating independent applications, services, and utilities, thereby enhancing the overall RPA delivery excellence.

Eviden portfolio of offerings

Analyze

Process Mining – Understanding as-is business processes with help of automation tool.

Ideation – Incubator for New ideas that creates value for business.

Estimation – An effort calculator for correct sizing of process automation.

Documentation – Best practices inducted documentation.

Implement

Reusable Asset Adoption – Encourage usage of in-house reusable assets such as platforms, libraries, custom flows etc.

Code Quality Check – An automated code analyzer which deeply scans RPA code reports discrepancies.

Quality assurance – A guide to create quality checks covering all dimensions.

Secure coding – Rectifies security compromising coding practices.

Manage

Monitor – Continuously monitors deployed BOTs with Eviden Solutions like Bot Command Center and AIOps.

Remediation – Created tickets proactively instead of waiting for problem to occur leveraging AIOps.

ROI – Calculates return on investment made on automation program factoring overall ownership cost.

Knowledge Management – A knowledge base to capture learning in RPA Implementation to refer in future.
