Eviden's French Aerospace Defense Electronics Business Unit obtains EMAR 21G certification with the support of Bureau Veritas

Since 2022, Bureau Veritas experts have been assisting the Eviden development and production site in Aix-en-Provence with the deployment of requirements related to the production of aeronautical equipment in accordance with EMAR 21G regulations.¹

Paris, France - March 11, 2024 - [Eviden](#), the [Atos Group](#) business leading in digital, cloud, big data and security, announces that at the end of 2023 it received EMAR 21G approval for its development and production site in Aix en Provence. For Eviden, obtaining this accreditation, with the support of Bureau Veritas, marks a key milestone in its ability to meet the challenges of its French and European defense customers.

In order to meet the expectations of its customers operating in a state or military environment, Eviden has deployed a project at its critical systems design and production site in Aix en Provence to develop its organisation in order to comply with European military and state regulations in the field of Initial Airworthiness (EMAR21G - Production). It was in this context that Eviden approached Bureau Veritas Exploitation to help it implement this approval.

Mickaël Clermont, Director of Bureau Veritas' Aeronautics and Space division: *"Our tailor-made assistance enabled the Eviden site in Aix-en-Provence to benefit from our expertise from A to Z and our support in the deployment of its aeronautics certification project. From the initial assessment of the system and resources in place to the preparation of the certification audit conducted by the authority, our experts worked hand in hand with our client's teams to meet the challenges of regulatory compliance and operational performance."*

Valérie PETAT, Eviden, Atos Group Managing Director responsible for the approval: *"This is the fruit of several months of teamwork, with everyone involved at their own level, making this project a success. Integrating this state standard for the airworthiness of state aircraft underlines our commitment to this cutting-edge technology and our ability to deliver militarised aeronautical equipment over the long term."*

¹ European Military Airworthiness Requirements, French and European certification for military airborne environments.
