

Connected and Collaborative SaaS Solutions

Offering description:

Transformations following clean core principle will increase the importance of an best of breed solution architecture with connected and collaborative SaaS Solutions supporting future ready business process effectiveness & efficiency.

Purpose / Market Drivers

Todays SAP transformations are increasingly focusing on a strong standardization direction. This follows the clean core approach and require a pace-layered IT Architecture (acc. to Gartner).

In this matter business process effectiveness and efficiency customers is served by a best-of-breed adoption of solutions in the IT strategy.

The utilization of the SaaS solutions require an according process guidance together with lean configuration and intensive change management towards a higher standardization of business processes.

In order to support our customers best we offer a full range consulting from the selection of a solutions, the functional design, implementation up to the integration in their IT ecosystem and business organization.

With our end-to-end approach we ensure an adoption of best practices in the business operations, the fast return on investment and the ability to stay ahead with future innovations.

Customer Challenges

Outdated monolithic IT landscapes are too complex to manage in the matter of:

1. Keeping up to speed with innovations (AI, GenAI, Connectivity,...)
2. Serving business needs according evolving business models
3. Scaling according to the data point created in the future
4. Managing growing amount of interfaces

Furthermore highly customized functionality in monolithic systems can not serve the need of growing connectivity & collaboration with stakeholders along the value chain.

Therefore a higher degree of standardization and modularization is required.

Solution from SAP

Following the principle of a pace-layered IT architecture we design & implement modular IT landscapes serving the business processes best.

With a clean core approach for the ERP and a best-of-breed selection for differentiating business processes we support our customers in the selection of the right SAP cloud solution, the functional design of their future process flows & value chains, the implementation of the solution and the continuous innovation of business and IT.

Within the SAP ecosystem a comprehensive suite of dedicated SaaS solutions are offered which are part of our domain specific consulting. This includes for example:

1. SAP Successfactors
2. SAP Ariba
3. SAP Integrated Business Planning (IBP)
4. SAP Digital Manufacturing
5. SAP Intelligent Asset Management
6. SAP Sales Cloud, Commerce Data Platform
7. SAP Sustainability Footprint Management (SFM)

With our industry expertise we identified various business scenarios where we offer valuable packages to close functional gaps of the standard solution and to increase the return on investment for our customers projects. For example with our supplementing Eviden Solutions*:

8. Close the Loop Manufacturing
9. WaterPack 2.0
10. Work2Success
11. ALTEA
12. Label Print Cockpit
13. Green Procurement
14. Enterprise Asset Management Cockpit

*Selection and not a complete overview
