

EVIDEN

External Key Storage for AWS

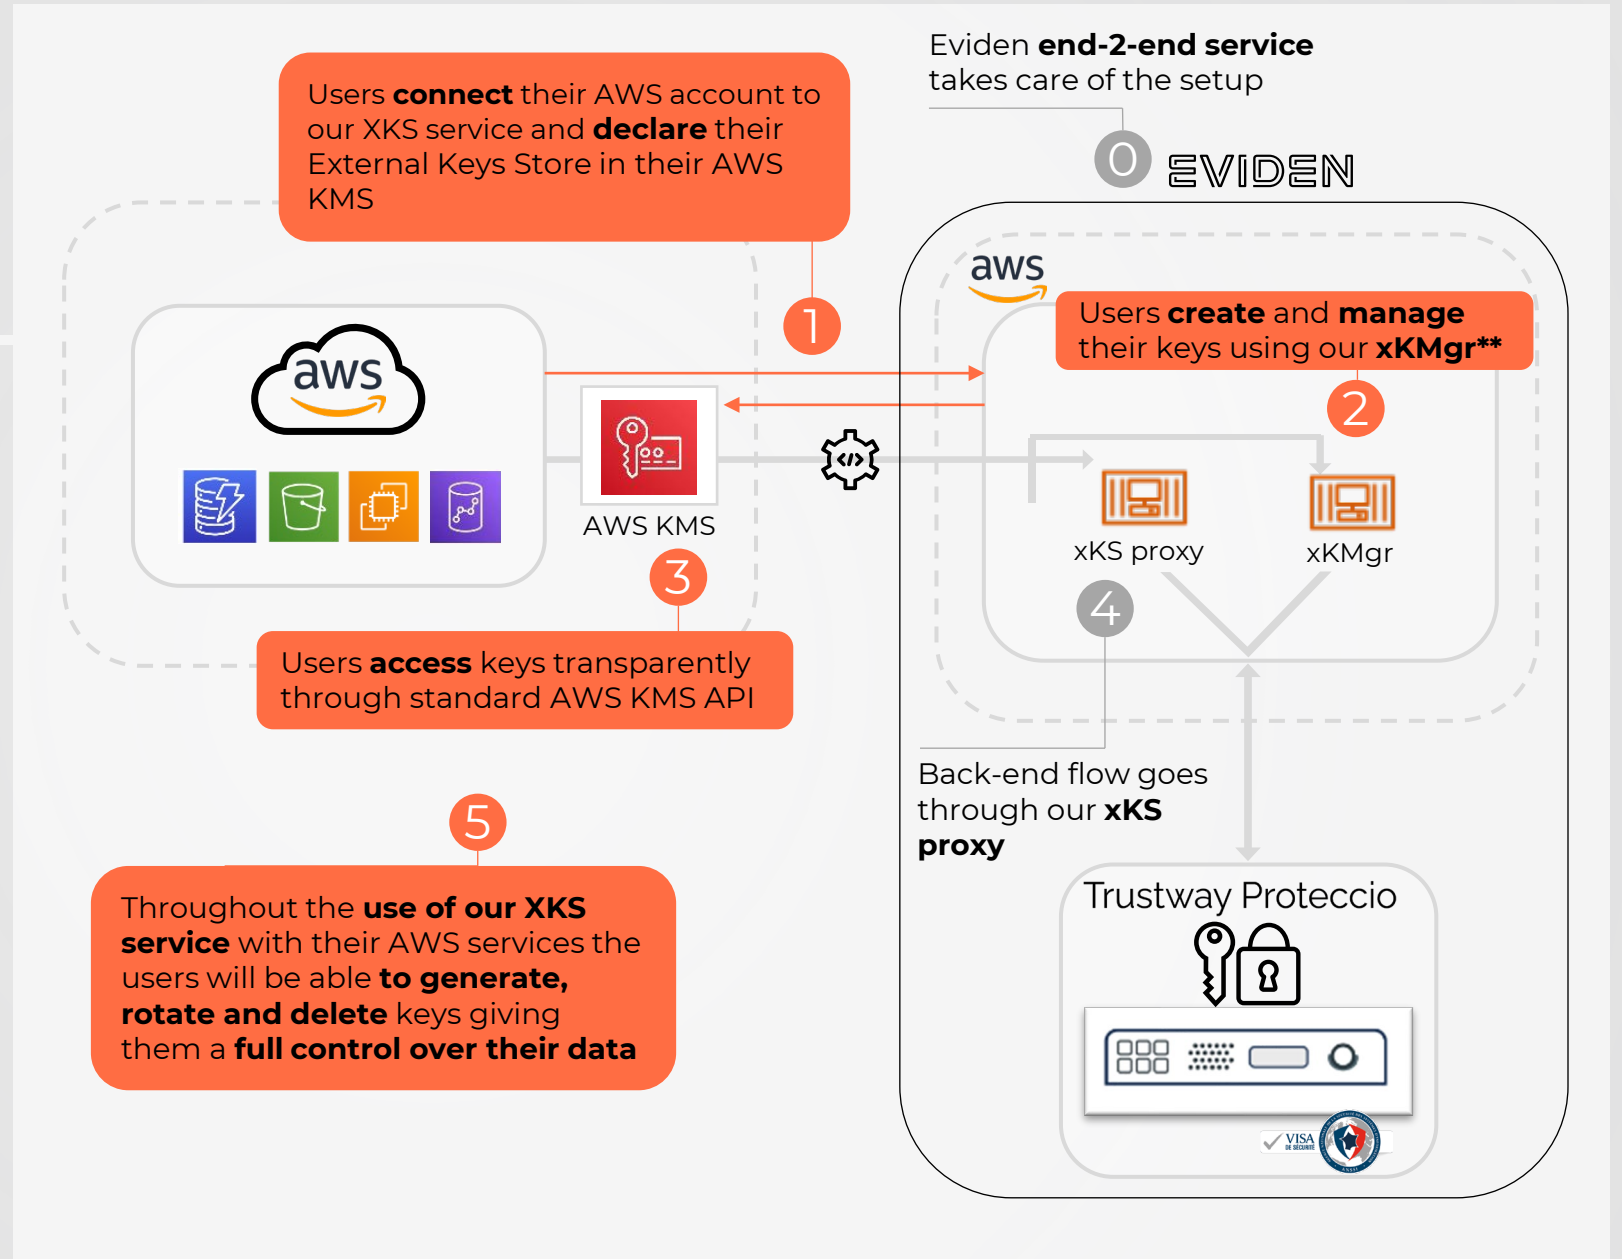

How to protect your most sensitive and critical data for more sovereignty and with the easiest customer experience

External Key Storage for AWS

Customer journey

An end-2-end solution fully managed and operated by Eviden that enables AWS customers to protect their most sensitive and critical data, by maintaining control of their own encryption keys in a HSM* Trustway Proteccio™ securely stored in a datacenter outside the cloud.

- Integration with most AWS services (Amazon EBS, AWS Lambda, Amazon S3, Amazon DynamoDB, and over 100 more services)
- Full control of the HSM master encryption keys
- Increased level of Sovereignty
- Easy SaaS customer adoption

* **HSM:** Hardware Security Module
 ** **xKMGr:** External Key Manager
