

# Veolia Environnement

**Secure Digital Workspace, preserving data sovereignty in a cloud native environment Google Platform.**

## The client

With 175,000 employees worldwide, and an annual turnover of 27 billion euros, Veolia designs and deploys solutions for water, waste and energy management and thus participates in the sustainable development of cities and industries. In 2019, the Veolia Group supplied 98 million inhabitants with drinking water and 67 million with sanitation, produced almost 45 million megawatt hours and recovered 50 million tonnes of waste.

## The challenge

Veolia made the choice a few years ago to start on a 100% Cloud strategy going as far as using GSuite for collaborative work. Overly sensitive documents, however, continued to be processed locally via Microsoft and PC tools for sovereignty issues, which had the effect of blocking the global and full deployment of Gsuite and Chromebook.

EVIDEN

# Veolia Environnement

## Highly Secure Digital Workplace, based on GCP

### The solution

- Strong authentication, but easy to use, to access the environment.
- Identity Management embedded in the solution.
- Gmail with end-to-end encryption.
- File sharing features with control over the root encryption keys.
- Collaboration with Google online editors (Docs, Slides, Sheets).
- Level 1 to 3 support and key users training.
- Continuous security monitoring,

### The impact

- Sovereignty over data and identities provided with Trustway and our products.
- Google end-user experience.
- The whole solution is provided as a Service.

### Why Eviden

- Eviden is Recognized as reliable, dedicated partner and the collaboration.
