EVIDEN

ERP transformation with Oracle Cloud Solutions

Eviden's mission is to be your preferred Digital, Cloud, data, and security partner to help build your digital future - Now and for generations to come.

Eviden helps customers in their Cloud transformation journey. We continuously strive to improve their systems and keep them updated with the new technological changes and upcoming releases.
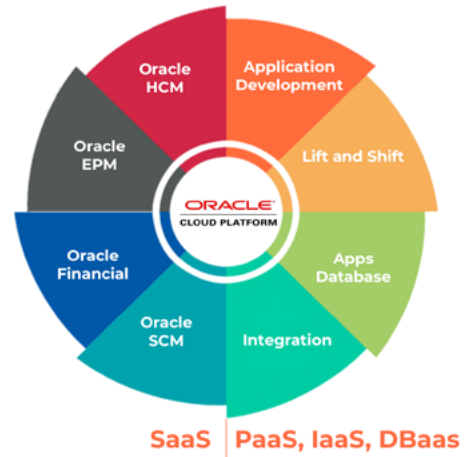

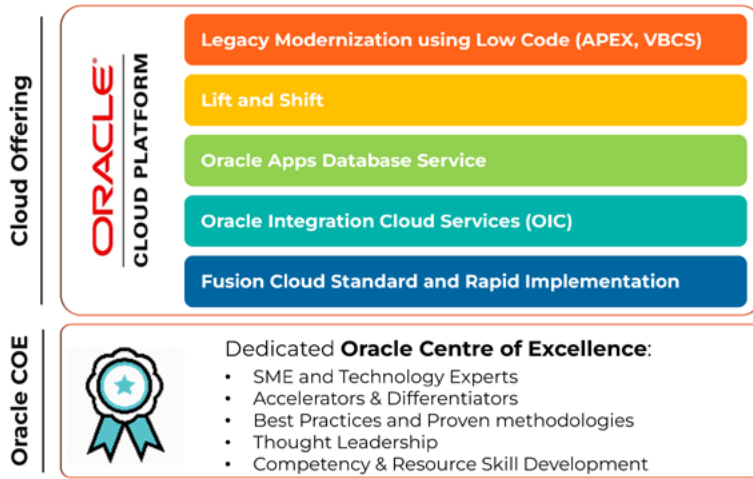

ERP programs have the connotation of being long and complex, but this is not the case with Oracle cloud. The streamlined implementation process allows the engagement team to focus on delivering tangible business value.

Companies have been using legacy applications for decades, but digital technologies have altered the business landscape. Legacy applications are no longer compatible with the new digital ecosystem, which affects business growth. Harness the Oracle Cloud Revolution - Create an advanced and futuristic application stack using Eviden Oracle Cloud Solution.

Eviden Oracle Application Transformation solutions ensure that, you stay ahead of the competition by making your business more agile. We help lower ownership cost, create secure, scalable, and integrated systems, and provide real-time analytics to drive business excellence.

Oracle Cloud SaaS & PaaS Services Portfolio

Preconfigured Solution Sets: Eviden offers preconfigured solution sets, built on Oracle SaaS applications, such as Oracle ERP and Oracle HCM Cloud. These solution sets include predefined configurations, templates, and process flows that accelerate the implementation timeline.

Integration Frameworks: Eviden supplies integration frameworks and tools that facilitate seamless integration between Oracle SaaS applications and other systems within an organization's ecosystem. These frameworks streamline data flow, enable real-time integration, and simplify complex integration scenarios.

Data Migration and Conversion Tools: Eviden offers data migration and conversion tools that speed up migrating data from legacy systems to Oracle SaaS applications. These tools help in data mapping, data cleansing, and data validation, ensuring a smooth transition to the new platform.

> Our accelerators are designed to help organizations hasten their digital transformation journeys and maximize the value they derive from Oracle's SaaS and PaaS platforms.

Accelerate into the Digital Transformation Age

Eviden and Oracle: Creating new business opportunities.

We have recalibrated our offerings to build a robust cloud implementation methodology, using Agile framework for faster business value adds with a quick turnaround time.

Strategic focus on Oracle solutions

Eviden's Oracle solutions have sharp focus on innovation and automation. We are in process of building tools, accelerators, and transformation asset to help customer in their transformation journey. A strategic element of our global portfolio is using a common design and delivery methodology, across regions.

Invested in Dedicated Oracle practice

Eviden is committed to investing in Oracle technology and applications, with dedicated global practice and 2000+ Oracle* consultants. Oracle COE supports building innovative customers exploring oracle new releases to pass on benefits that matters to customers.

360°-degree solution

Beyond technology, we empower businesses to transform through holistic consulting services. We serve as trusted advisors and strategic enablers, guiding businesses through the complexities of digital transformation journey and helping them achieve tangible benefits.

Multi-industry domain focus

Eviden has domain experts across industry verticals like manufacturing, retail, logistics, banking & financial services, healthcare, telecom, media, and insurance with experience in digital consultation, legacy modernization, ERP transformation and rollouts. Eviden has successfully delivered some of the world's largest Oracle engagements in Oracle Cloud, Siebel, PeopleSoft, EBS, Fusion and Business Intelligence.

Oracle partnership

Eviden has a strong alliance with Oracle, giving us ready access to expert resources to help design and deploy high-quality end-to-end services and Solutions.

Eviden Differentiators

Eviden employs In-house tools, Solutions, Accelerators, and utilities to speed up Implementations, Development, Upgrade and Rollouts.

Generative AI Enablement

We specialize in utilizing Oracle Cloud Infrastructure (OCI) and SaaS solutions to power our Generative AI offerings. Our custom-made Generative AI Accelerators are designed to improve customer experiences, providing us with a distinct competitive advantage. We gain deep understanding of our clients' business practices. We use these insights by integrating Generative AI processes and features based on their needs. By doing so, we are not just offering a one-size-fits-all solution, but rather a customized approach that aligns with their unique operations. This approach yields more effective and efficient outcomes, as it leverages their existing best practices while enhancing them with AI capabilities.

How do you benefit?

Organizations working with Eviden for Oracle SaaS and PaaS implementations can leverage these accelerators to expedite project delivery, reduce risks, and optimize the value obtained from their Oracle Cloud investments.

Our four pillars of strength:

- **Client Intimacy:** We forge deep, collaborative relationships with our clients, understanding their unique needs and aspirations.

- **Innovation:** We harness the collective brilliance of our diverse experts to deliver innovative and tailored solutions that drive transformative impact.

- **End-to-End Transformation:** We deliver real-world digital transformation, integrating our consulting expertise into our delivery practices.

- **Sustainability:** We embed environmental, social, and governance considerations into every aspect of our projects.
